How to Install ContactPlus Wowonder Addon

Welcome to the ContactPlus installation guide! ContactPlus is a dynamic contact form solution designed to enhance user communication on your website, enabling seamless integration with department-specific email options, user-friendly fields, and anti-spam features. In this guide, we will walk you through each step of the installation process, ensuring you're able to set up ContactPlus quickly and easily. This tutorial will help you configure everything from database setup to custom settings, so you can start managing user inquiries more effectively right away. Let's get started!

Before you start, please backup your files, uploading this will overwrite the following files

in case you lose this installation file, this tutorial is also online here in this link

howto.scriptstribе.com

if you need help or have suggestions please visit the support [forum here](#)

/themes/yourtheme/layout/contact/content.phtml

xhr/contact_us.php

Step 1: Upload your files

Unzip the file and upload it to your wowonder root following the folder structure.

[newfiles.png](#) or type unknown

Step 2: Run the installation file

This step will install the department tables Contact info Tables and Languages

Visit yoursite.com/install-contactplus.php and click the green button (See the picture below)

[install.png](#) or type unknown

Step 3: This will add the admin menu and pages

Open admin-panel/autoload.php

and look for

```
$pages = array(
```

at the very end or very beginning add:

```
//Contact Plus Start
'contactplus',
'add-department',
'save_contactplus_settings',
'save_department_emails',
'delete_department',
//Contact Plus End
```

It should look just Like in this picture (Click on the image to expand)

[addpages.png](#) image/svg+xml type unknown

on the same file look for (see the picture below)

```
<a href="#">
<span class="nav-link-icon">
<i class="material-icons">view_agenda</i>
</span>
<span>Manage Features</span>
</a>
```

and add this code before it:

```
<!-- ./ ContentPlus Start -->
<a href="#"><span class="nav-link-icon"><i class="material-icons">contact_mail</i></span>
<span>ContactPlus Settings</span></a>
<?php if ($is_admin || ($is_moderoter && $wo['user']['permission']['site-settings'] == 1)) { ?>
<ul class="ml-menu">
<li><a <?php echo ($page == 'contactplus') ? 'class="active"' : ''; ?> href="<?php echo
Wo_LoadAdminLinkSettings('contactplus'); ?>" data-ajax="?path=contactplus">ContactPlus Settings</a></li>
<li><a <?php echo ($page == 'add-department') ? 'class="active"' : ''; ?> href="<?php echo
Wo_LoadAdminLinkSettings('add-department'); ?>" data-ajax="?path=add-department">Add Contact
Departament</a></li> <?php } ?></ul>
<!-- ./ ContentPlus End -->
```
